

Feature Name	Feature Description	Images
Student A: Tze Han OLED Basic Task A	Enabled through menu (4A) LED turns on for 3s after each button press BTNU: Cycles through 5 stages LD14: BTNU is ignored when LED is on	
Student B: Yan Zaiya OLED Basic Task B	Enabled through menu (4B) LED turns on for 5s after each button press BTND: Cycles through 4 stages LD12: BTND is ignored when LED is on	
Team AVI	Enabled through menu (4C) Audio volume indicator OLED: Combined visualization from basic tasks A and B 7-segment: Volume as digit 0-5 LEDs: Volume intensity	
Student A: Tze Han DTMF Classifier	Enabled through menu (DTMF) Classifies DTMF tones using 32-bit fixed-point Goertzel Filter @ 20kHz sampling OLED: Power visualization of each frequency bin 7-segment: Scrolling display of interpreted signals LEDs: Index of symbol on the DTMF grid BTNL, BTNR: Change width of bars SW[0]: Toggles frequency overlay – visible (1) / hidden (0)	 
Student B: Yan Zaiya Stopwatch	Enabled through menu (TIME) A stopwatch that counts in the form of XXX.YY seconds up to 999.99 seconds OLED: Shows the split time (latest three) 7-segment: Shows the real-time stopwatch counts BTNU: Start / continue the stopwatch BTND: Stop the stopwatch BTNL: Split the time BTNR: reset the stopwatch and split time	

<p>Team Menu Navigation</p>	<p>7-segment: Task selection OLED: Task selection BTNL, BTNR: navigate through menu items BTNC: Select task/navigate to menu from task</p>	
<p>Team Morse Code</p>	<p>Enabled through menu (MORS)</p> <p>Microphone samples morse code and classifies into respective symbols based on duration of the beep (Farnsworth timing)</p> <p>OLED: Text box showing previous characters 7-segment: Last symbol converted LED[0]: Shows state of input LED[15-2]: Shows dot/dash pattern SW[0]: Toggle between input methods – microphone (0) / BTNU (1) SW[15]: Toggle between OLED displays – decoded message(0) / actual morse code(1) BTNU: Alternate input method BTNL: Clear OLED text</p>	  
<p>Team Menu Lock (Locking)</p>	<p>Enabled through menu (LOCK)</p> <p>User can set a 4-character password using the morse input methods shown above</p> <p>OLED: Shows the interpreted characters</p> <p>At confirmation screen, BTNR: Confirm password BTNL: Re-input password</p>	 
<p>Team Menu Lock (Unlocking)</p>	<p>When board is locked, the user must enter the correct password using the same input methods.</p> <p>Menu and the tasks cannot be accessed in this state</p>
